AVIATION

EXCL

Exchange Component and Leasing Subscription Program

Parts Support *Reimagined.*

It's time aviation operators are given control over their parts support.

Voyageur has developed a program that challenges aviation to rethink the inventory programs that are currently offered on the market. Airlines deserve more freedom, flexibility, and control over maintenance costs.

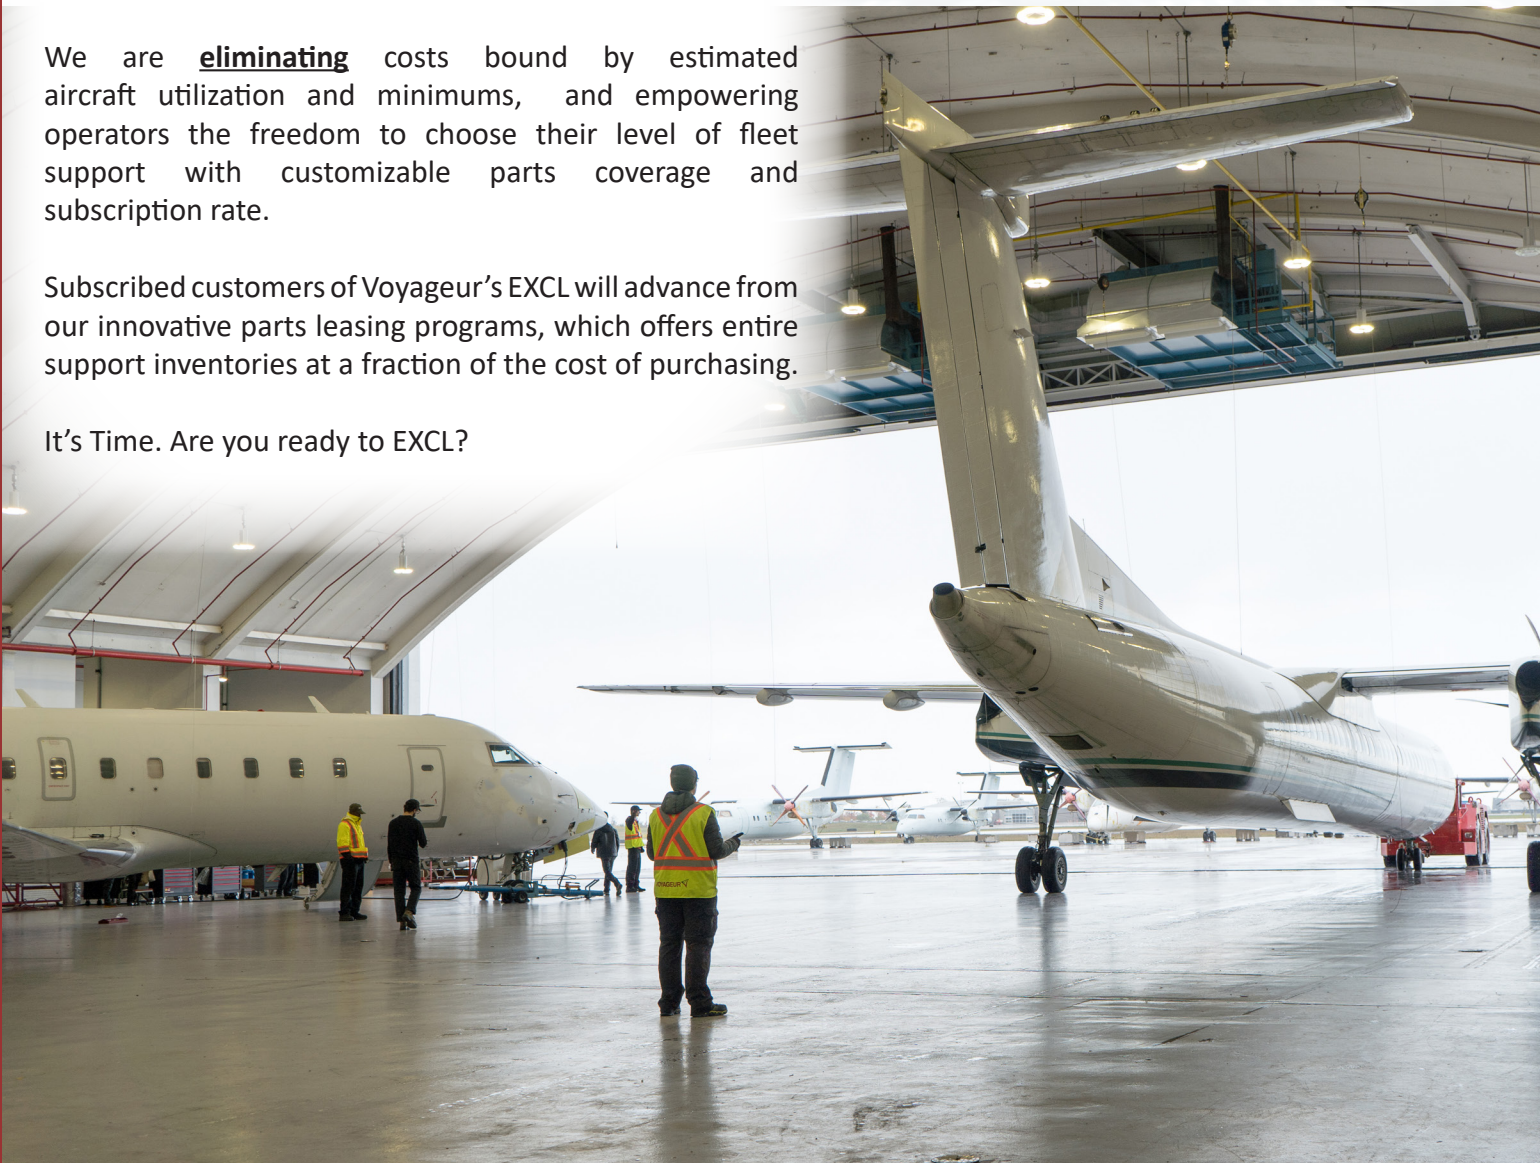

Voyageur's Exchange Component and Leasing ('EXCL') subscription program is completely customizable to meet airline's unique needs while considering the new operating environment.

We are **eliminating** costs bound by estimated aircraft utilization and minimums, and empowering operators the freedom to choose their level of fleet support with customizable parts coverage and subscription rate.

Subscribed customers of Voyageur's EXCL will advance from our innovative parts leasing programs, which offers entire support inventories at a fraction of the cost of purchasing.

It's Time. Are you ready to EXCL?

Welcome
to ultimate
fleet
maintenance
flexibility.

Voyageur's **EXCL** explained.

Voyageur's Exchange Component and Leasing program is a paid monthly subscription service offering operators direct priority access to all rotatable components. We guarantee in-stock supply for all members.

Members elect which aircrafts they want registered under the EXCL program and choose the parts they wish to be covered under this service.

Components are exchanged at a substantially reduced pre-established fixed price, leaving operators flexible to manage their own aircraft maintenance cash flow. Voyageur guarantees supply, and repair and overhaul of rotatable components within all ATA chapters to the latest modification status.

We impose no restrictions or limitations, no matter what your fleet size or utilization.

Begin to **EXCL**

Level 1 - EXCL Plus

Coverage: Standard scope.

Level 2 - EXCL Premium

Coverage: Comprehensive scope.

Level 3 - EXCL All-Access

Coverage: Nose-to-tail full support.

Member Advantages

- Access parts when needed with guaranteed service levels.
- Substantial savings with pre-determined fixed exchange pricing.
- 24/7 parts service support.
- Component performance guarantees. Ready to ship within pre-determined time frames based on priorities.
- Flexibility to adjust scope as fleet or requirements change.

Subscription Benefit

- Significantly reduce large initial capital investment for inventory.
- Component repair and overhaul management can be added as part of the leasing program.
- Inventory levels can be easily changed to support aircraft utilization variances, or changes to the operating environment.
- Lessen reliance on vendor performance.
- Voyager provides lease packages to satisfy many requirements from main base kit to line outstation.

**Service currently available for the
Dash 8-400.**

**Stay connected for future aircraft type
subscription release.**

VOYAGEUR 

Voyageur's **EXCL** Factor.

This newly developed innovative parts subscription provides entire support inventories at a fraction of the cost of purchasing. This program was designed from the operating experience of Voyageur Aviation and our several business units. These synergies attribute over 50 years of aviation excellence for the regional aircraft marketplace. We are a long-standing operator of the aircraft we support and know the parts and redundancies required when building your inventory package and can provide recommendations of stock and stock positions.

Members will enjoy the advantages created by Voyageur's knowledgeable and experienced team.

- o In-house R&O capability of Voyageur Aerotech and Jazz Technical Services.
- o Our long-standing relationships with vendors have resulted in our ability to provide attractive reduced fixed-rate discounts to subscription members.
- o Total logistics and transport services including warehouse locations based in North America and Europe.
- o Global experience and established shipping channels allow for delivery of your AOG parts anywhere in the world, swiftly and cost efficiently.
- o Critical response service with Voyageur AOG support available 24/7.
